

TRADEBE ENVIRONMENTAL SERVICES

PROVIDING TECHNICAL SOLUTIONS IN THE RESEARCH TRIANGLE AREA

Firms active in the Life Sciences, Pharma and Biotechnology industries **naturally accumulate chemicals or other hazardous materials that require a proper technical management to minimize risks or accidents.** Identifying, handling and processing those materials is a job for knowledgeable professionals.

Tradebe's **Technical Services Team** provides **comprehensive, safe, reliable and sustainable solutions,** leveraging extensive field experience and all-encompassing in-house technologies.

OUR SERVICES

LABPACK

For small quantity containers of laboratory chemicals, we offer:

- A dedicated team of **degreed chemists highly prepared** to handle a broad variety of chemicals in the safest possible way and in compliance with all regulatory standards.
- An **integral management service** that includes a **de-packing step** in our facilities, allowing us to select the best treatment technologies for each material and look for the best fit with customer's sustainability and financial needs.

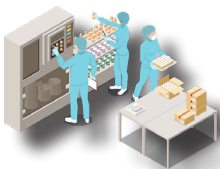

CYLINDERS

For compressed gas cylinders, known or unknown, we offer:

- **State-of-the-art processing capabilities** at our plant in Indiana, one of the few facilities in the US technically capable to **process a wide spectrum of these materials,** including **acid gases, reactives and unknowns.**
- An **experienced team of technical cylinder specialists** that will perform an assessment of the cylinders on-site and determine the most appropriate way for handling, processing and disposal.

LAB MOVES

For laboratories outgrowing their current site and needing additional space or that are relocating, we offer:

- Demonstrated **expertise in end-to-end management** for any type of laboratory moves, following the highest safety standards.
- Our services include **identifying, sorting and packing** the chemicals, safe and compliant **transportation,** and **de-packing** at the desired final destination.

MORE SERVICES: Tradebe also offers Remote Opening Services, Full-Time or Part-Time On-Site Services, Industrial Cleaning, Sustainable Waste Recycling, Hazardous Waste Management and Disposal, as well as Emergency Response Services in the area.

ON DEMAND

Our team of chemists will be at your disposal upon request, either by phone or email.

ON-SITE

Tradebe personnel assigned at your site full-time or part-time for day-to-day efficiencies and keeping your site in compliance with RCRA.

TRADEBE, A NAME YOU CAN TRUST

Sustainable Waste Management

Tradebe is the industry leader in sustainability for Hazardous Waste processing, equipped with the latest technologies and setting the priority on recycling and recovery first. We recycle more than 90,000 tons of waste per year.

Experienced and Highly Trained Chemists

Knowledgeable in handling hundreds of different chemical types that can be found at just one site. Tradebe is the single source for the management of all waste streams.

Safe and Reliable

Tradebe has +30 years of expertise in the industry as well as the regulatory experience, the technology and the chemical knowledge to perform all services in the safest and most environmentally compliant way.

High Quality Service

We are highly committed to customer satisfaction as we strive to create proactive and personalized relationships with them to ensure we satisfy their short and long-term needs.

Local Experts, National Network

We provide local service with immediate response times and short distances, powered by a national network of facilities, service centers and representatives.

GET TO KNOW MORE ABOUT...

LABPACK

Whether the chemicals used for your primary activities are obsolete, off-spec, leaking or unidentified, they are potentially dangerous if left unattended.

Our services include:

- Identification of all chemicals, including unknowns, performed by our industry experts.
- Classification and packaging by compatibilities in DOT-approved containers and satisfying all DOT and EPA requirements.
- On-site management of highly hazardous chemicals using specialized Remote Opening Equipment, allowing for safe handling and transportation.
- De-packing in our facilities to select the best treatment technologies for each material, in order to match customer's environmental sustainability and financial needs. Tradebe is one of the few in Environmental companies in the market providing this selective solution.

CYLINDERS

Tradebe is a leading provider of Cylinder Management services in the US, with unique internal capabilities to efficiently process a wide spectrum of cylinders.

Our services include:

- On-site assessment and identification of any type and size of cylinder.
- Determination of the most suitable packaging and handling alternatives following industry and government approved best-management practices, as well as high health and safety protocols.
- Use of Tradebe-owned cylinder over-packs to transport highly hazardous cylinders or cylinders with bad valves and overall poor condition.
- Ability to process highly hazardous cylinders, cylinders with bad valves as well as unknowns.
- Transportation services utilizing owned resources operated by trained Tradebe chemists and drivers.
