

Tradebe Accepts All Common Types of Cylinders

Common Types of Gas Cylinders
Tradebe Processes include:

Non-RCRA | Flammable | Toxic | more...

ALL

Quantities
and
Conditions

- Unidentified or unmarked cylinders?
- Cylinders with inoperable valves?
- Damaged cylinders requiring containment?
- Leaking cylinders requiring repackaging?

Tradebe's team will work with generators to identify, handle, repackage as needed and properly dispose of unknown gas cylinders that others may not be able to accept.

Tradebe's Turnkey Cylinder Program includes:

- On-line Project Tracking
- Low, per Cylinder Disposal Cost
- On-site Identification and Removal
- Nitrogen Purge Empty Cylinders
- Scrap Cylinder Metal
- Recovery and Recycling

From START

CYLINDER MANAGEMENT

Experience and Knowledge - There is no substitute

State-of-the-art analytical technology allows Tradebe to handle a wide range of gases and cylinder types quickly and efficiently with the highest level of safety.

Our state-of-the-art technology utilizes a reaction vessel and scrubber system to process the gases for disposal and includes cylinder decommissioning and scrapping of the cylinder vessel conducted under a nitrogen purge.

Tradebe's experienced team of technical cylinder specialists manage thousands of cylinders each year that come from a wide variety of generators who trust Tradebe's knowledge and experience.

DID YOU KNOW?

Tradebe's IN facility is one of the few facilities in the US with on-site cylinder processing capabilities.

CGA Knowledge and Experience - Our team is uniquely qualified to manage your compressed gas cylinders with extensive training and knowledge of the Compressed Gas Association, (CGA), standards and markings.
