10 Day Transfer Facilities

TRADEBE

Environmental Services™

10-Day Transfer Facility

The 10 Day facility operates as a transfer facility for RCRA hazardous and non-hazardous waste. Operations include storage, repacking/consolidating, and transportation of wastes to off-site disposal facilities.

TRADEBE provides hazardous and non-hazardous chemical waste collection, packaging, and transportation services to Universities and a variety of industry customers. TRADEBE operate two US DOT permitted 24/26-foot straight trucks from these locations.

Containers of regulated waste received on site are packaged in accordance with Department of Transportation (DOT) requirements and transported by a qualified commercial driver licensed (CDL) vehicle operator. Following the allotted 10-days, containers will then be transported to one of Tradebe Treatment and Recycling, LLC RCRA Permitted facilities or to an alternate approved facility.

TRADEBE has added several 10-day facilities to increase service capabilities in North America

- July 2010 - TRADEBE began accepting waste at our 10 day waste transfer facility in Pittsburgh, PA. Local Technical Field Service Lab Pack crews now service universities and hospitals in Western Pennsylvania and Eastern Ohio.
- 2995 Grand Avenue
Neville, PA 15225-1601

- August 2010 - TRADEBE opened our 10 day transfer facility in Kansas City, KS. Local Technical Field Service Lab Pack crews now service our existing University contracts in the state of Kansas and the surrounding region from this facility.
- 555 Stanly Road,
Kansas City, KS 66115
