

INTEGRATED QUALITY, SAFETY, HEALTH AND ENVIRONMENT POLICY

Tradebe is a business organization dedicated to the management, treatment, disposal, collection and recovery of waste, environmental consulting, industrial cleaning services, dismantling and demolition and storage and sale of petroleum products. It develops its activities applying sustainability criteria and seeks innovative solutions in each of its processes. Tradebe combines its constant concern for the health and safety of people, environmental protection and the satisfaction of its customers, with profitable growth of the business.

Aware of the importance of the health and safety of all employees, the protection of the environment and customer satisfaction, and in line with its corporate values, Tradebe undertakes to integrate its management system and to focus its policy on the following CORE PRINCIPLES:

COMPLY WITH THE LEGAL OR VOLUNTARY REQUIREMENTS OF INTERESTED PARTIES applicable to each work center on safety (industrial and / or serious accidents), occupational health and environmental protection. Adapting to the new ISO 45001 certifications where OHSAS 18001 was available and adopting the ISCC Plus seal and the ISO 17025 accreditation for the product TGF.

OFFER A QUALITY SERVICE to our clients, as well as to the main relevant actors (private company, public bodies ...) oriented to the satisfaction of their needs and expectations, which guarantees their trust and fidelity.

CONTINUOUS IMPROVEMENT, based on a strategic analysis of the context of each business, managing the opportunities and risks that are identified and influencing the behavior related to the prevention of accidents (particularly serious ones) and damage (to health), protection of the environment (also with the best possible energy management) and quality assurance.

Continuing with a cultural change in the organization based on three central concepts: increase the commitment and leadership of all workers, give greater visibility to managers and managers acting as an example and give a greater role or training to all workers through better communication and facilitating their active participation, with a wider use by all the employees of an App for reporting. Additionally, improve the climate of safety in all work centers based on the survey carried out in 2018.

ASSIGN THE TECHNICAL AND HUMAN RESOURCES NECESSARY AND SUFFICIENT TO MAINTAIN A DOCUMENTED INTEGRATED MANAGEMENT SYSTEM that ensures compliance with this policy.

MONITOR THE HEALTH AND SAFETY IN OUR WORK CENTERS of our employees and third parties, depending on the risks inherent in each job or activity, eliminating avoidable risks and evaluating those that are not. Promote, in particular, compliance with the policy of the 7 Rules that Save Lives.

DEVELOP, CHECK AND REVIEW THE SELF-PROTECTION PLANS AND THE EMERGENCY MEASURES, as well as improving, systematizing the planning of emergencies and managing action in crisis situations.

COLLABORATE WITH THE ADMINISTRATION, THE COMPETENT PUBLIC ORGANIZATIONS AND OTHER BUSINESS ASSOCIATIONS in the search for solutions for the environmental problems of our society.

PROMOTE POLLUTION PREVENTION AND THE PROTECTION OF THE ENVIRONMENT primarily backing the application of technologies and processes based on minimization and valuation criteria, assisting our clients in the Global objective of a Circular Economy.

MINIMIZE THE IMPACT on the environment and the health and safety of workers and interested parties and ensure proper management of changes.

PROMOTE TALENT DEVELOPMENT OF ALL EMPLOYEES, through information, training and awareness, in the achievement of the established objectives of continuous improvement.

GUARANTEE THE PROPER COORDINATION OF THE NECESSARY BUSINESS ACTIVITIES to ensure that the current legal requirements and the internal regulations applicable in the workplace to be performed are met. Through a review of the current procedure and hiring a platform for its management.
